

Rotaject[®] Technology

For high viscosity
formulations

Compatible with the following device specifications:

Device Type	Disposable Auto Injector
Primary Container	1mL or 2.25mL Syringe with Staked Needle
Viscosity	Up to Several Hundred Centipoise
Route of Administration	Subcutaneous
Needle Insertion	Automatic or Manual
Needle Removal	Automatic or Manual

- Supports formulations of up to several hundred centipoise
- Patented clock spring technology for constant high force delivery
- Plunger rod adjustable for drug specific requirements
- Strengthened syringe flange & shoulder support to reduce risk of glass breakage

Key Features

- ✓ Proven in clinical & commercial use
- ✓ Compatible with automatic or manual needle insertion
- ✓ Human Factors engineering for optimum patient comfort
- ✓ Supports passive locking needle cover to reduce risk of needle stick injuries
- ✓ Supports audible, visual & tactile feedback mechanisms during the injection
